PROFESSIONAL PROFILE

I investigate difficult website problems, organize large content systems, and check whether proposed fixes actually work. At Trendi Marketing, my work spans website architecture, WordPress behavior, crawl and indexing records, redirects, and technical QA. I compare the evidence before making a recommendation—and document what remains unknown.

TECHNICAL STRENGTHS

Root-cause investigation • Information architecture • WordPress / ACF QA • URL mapping and redirects • Crawl and indexing diagnostics • Evidence reconciliation • Change control • HTML, CSS and JavaScript • AI-assisted workflows

PROFESSIONAL EXPERIENCE

TRENDI MARKETING

June 2025 – Present

SEO Manager | Technical investigations and architecture

- Lead technical audits and investigations for a large multi-state legal website, from geographic page hierarchy to internal links, redirects, crawl records, and WordPress behavior.
- Helped replace inconsistent legacy URL patterns with a clearer national → state → city/office → practice structure, supported by URL mapping and validation checks.
- Test possible causes of technical problems against Search Console data, Screaming Frog exports, live responses, CMS records, and historical change logs. Keep confirmed findings separate from assumptions.
- Coordinate updates with writers, developers, and stakeholders; record approvals, saved changes, public verification, and issues still open.
- Reviewed an outside audit for a multi-location healthcare website, challenged recommendations that did not match the existing site, and proposed a clearer location–service–injury structure.
- Designed AI-assisted investigation routines that preserve evidence, require review before implementation, and track whether a fix was actually verified.

ALLISON STOCK INC.

2022 – Present

Owner | Web development and digital projects

- Designed and built responsive websites and original blog and portfolio projects with HTML, CSS, JavaScript, and WordPress.
- Extended an established WordPress website with new page and form functionality while keeping its existing design and navigation consistent.
- Handled content organization, accessibility checks, technical performance testing, and structured data on independent projects.

Genny Allison

TECHNICAL INVESTIGATIONS / INFORMATION ARCHITECTURE

SELECTED TECHNICAL WORK

Complex website architecture

MULTI-STATE LEGAL WEBSITE

Mapped geographic page relationships and legacy URLs; documented redirects, cross-page relationships, and validation needed for a large restructuring.

Technical investigations

CRAWLING • PAGE IDENTITY • WORDPRESS

Examined indexing discrepancies, unexpected page selection, multilingual content records, and interrupted link changes by comparing current and historical evidence.

AI-assisted workflow design

INVESTIGATION OPERATIONS

Designed repeatable steps for gathering evidence, classifying findings, requesting approval, verifying changes, and keeping recovery checkpoints. This system remains in development.

TOOLS AND WORKING METHODS

Investigation	Google Search Console, GA4, Screaming Frog, Ahrefs, SEMrush, PageSpeed Insights, browser developer tools, change logs, and spreadsheet comparisons.
Web systems	WordPress, ACF, HTML5, CSS3, JavaScript, JSON-LD, URL mapping, redirects, canonical directives, responsive layout, accessibility reviews.
Workflow	Git/GitHub, VS Code, Figma, ChatGPT, Claude, structured evidence registers, implementation checkpoints, and QA validation.

EARLIER LEADERSHIP EXPERIENCE

Allison's Daycare | Owner / Director

Operated a licensed daycare, managing daily operations, safety, compliance, parent communication, and administration.

Elite Services | Finance Director

Managed financial processes, financing approvals, contracts, lender relationships, and reporting.

Affiliated Foods | Floral Buyer / Department Lead

Advanced into purchasing leadership, handling vendor relationships, pricing, inventory, and seasonal planning.
